Summary

Ambitious Full-Stack Engineer and Computer Science graduate with hands-on experience building robust, end-to-end web applications. Specialized in creating high-performance, SEO-friendly frontends using React and Next.js, seamlessly integrated with scalable RESTful APIs and backend systems developed in Laravel. Proficient in JavaScript (ES6+), PHP, and modern CSS frameworks. Demonstrated ability to solve complex technical challenges, optimize database performance, and collaborate effectively within Agile teams to deliver user-centric digital solutions.

Education

Port Said University | Faculty of Management Technology and Information Systems

Major: Information Technology and Systems

Grade: 73.4% (Good)

Graduation: August 2025

Projects

Bistro Bliss

The project is a full-stack restaurant reservation system designed to manage dining bookings, featuring a user-friendly interface for customers and a functional dashboard for administrative management.

Technologies Used

React.js for a responsive and dynamic frontend interface.

Laravel (PHP) to power the backend API and server-side logic.

MySQL for secure and efficient database management.

Tailwind CSS for modern and streamlined styling.

<https://github.com/earth-lion/Bistro-Bliss>

Product Management System

A web-based application to efficiently manage and organize product lists, ideal for small businesses or inventory tracking.

Technologies Used

HTML5, CSS3, JavaScript

Strengths

Supports CRUD operations (add, update, delete, view)

<https://earth-lion.github.io/product-management-system/>

Smart Student Portal

A web-based platform for managing student academic information in one place, including profile, GPA, course registration, grades, and schedules.

Technologies Used

React.js for a responsive and dynamic frontend interface.

Laravel (PHP) to power the backend API and server-side logic.

MySQL for secure and efficient database management.

Tailwind CSS for modern and streamlined styling.

Strengths

Technical Skills

Frontend Development:

JavaScript (ES6+), TypeScript.

React.js, Next.js (SSR, SSG, App Router).

HTML5, CSS3, SASS.

Tailwind CSS, Bootstrap, Material UI.

Backend Development:

PHP (Modern Versions).

Laravel Framework (Eloquent ORM, Migrations, Seeders).

Building & Integrating RESTful APIs.

Authentication (Laravel Sanctum, JWT, Passport).

API Integration: Proficient in connecting Laravel RESTful APIs with React frontend for seamless data exchange.

Database & Storage:

MySQL, PostgreSQL.

Redis (Caching).

Cloud Storage (AWS S3 or similar).

Tools & Dev Ops:

Git & GitHub (Version Control).

Visual Studio (V.S code) .

Postman (API Testing).

Office & Data Management:

Data Entry: Fast and accurate data processing and database management.

MS Office: Expert in Excel (formulas, pivot tables, reporting) and Word (professional formatting).

Soft Skills

Agile Collaboration: experienced in working within team environments to deliver iterative software solutions.

Problem-Solving: adept at tackling complex technical challenges and optimizing system performance.

Professional Communication: skilled at translating technical requirements into user-centric digital products.

Languages

Arabic: Native

English: Good (reading, writing, and speaking)

Certificate

Full-Stack Web Development Diploma | AMIT Learning

Completion Date: June 11, 2026

Key Technologies: Advanced training in Laravel, React.js, Next.js, and RESTful APIs integration.

Focus: Developed end-to-end web applications with a focus on clean code, SEO-friendly frontends, and database optimization.

Grade : 100%
